

## Special Application

# Jobsite Report 87

### Explosive ordnance exploration

#### Drilling Rig

KLEMM KR 801-3GS

#### Customer

GbE, Grundbau Essen

#### Place

Essen, Germany

#### Drilling Job

Drilling of boreholes for vertical geoelectric surveys for the detection of explosive ordnance from World War II

#### Drilling Method

Auger drilling / rotary drilling w/o flushing

### Equipment

- Drilling rig KR 801-3GS
- double drill head (rotary / rotary)
- 1t-winch
- flushing pump
- oiler
- plastic coated crawler tracks
- operating panel and remote control unit

### Results

GBE Grundbau Essen drilled 27 boreholes with a diameter of 120 mm and a depth of 8 m in 2 days using the auger drilling method, including casing for explosive ordnance detection (deep probing).
